PROFESSIONAL SUMMARY

Computer Science Engineering graduate specializing in data engineering, cloud computing, and software systems. Experienced in building automated ETL pipelines, deploying machine learning models on AWS, and developing full-stack applications. Focused on performance optimization, data processing, and backend system design.

EDUCATION

Presidency University	Bangalore, Karnataka
Bachelor of Technology in Computer Science and Engineering	Aug 2022 – June 2026
<i>Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Cloud Computing, Object-Oriented Programming</i>	
Mount Carmel College	Bangalore, Karnataka
PUC in Science	Jun 2018 – Apr 2020
St. Thomas Public School	Bangalore, Karnataka
ICSE 10th Grade	Jun 2017 – Apr 2018

PROFESSIONAL EXPERIENCE

Ton Technology Services Pvt. Ltd.	Bangalore, Karnataka
Backend and Data Automation Engineer Intern	Jan 2026 – May 2026
- Engineered automated data pipelines to extract structured B2B data from 100+ global web sources. - Built Python-based ETL workflows, decreasing processing time by 60% and saving 15+ hours weekly. - Optimized backend scripts, increasing data collection speed and reliability by 40% across 5 streams. - Translated business requirements into scalable data solutions with an 4-member operations team.	

PROJECTS

Serverless AI Diagnostic Pipeline (AWS Cloud-Native)	May 2026 – Present
- Designed a serverless architecture using AWS Lambda and API Gateway for 100+ concurrent requests. - Deployed image classification models on Amazon SageMaker, decreasing inference latency to under 500ms. - Architected storage using Amazon S3 and DynamoDB, reducing retrieval times by 25% for 2000+ reports. - Implemented IAM roles and KMS encryption across 4 microservices to ensure strict data compliance. - Integrated automated CI/CD pipelines via GitHub Actions for seamless code deployments.	
User Analytics & Recommendation System	Aug 2025 – Nov 2025
- Built a user analytics dashboard to track engagement and behavioral metrics for 100+ active users. - Processed and analyzed 10+ GB of user interaction data using Python for behavioral trends. - Applied collaborative filtering and genetic algorithms, increasing recommendation click-through rates by 35%. - Optimized similarity scoring, reducing recommendation generation time by 20% for faster page loads. - Visualized key engagement metrics and trends using Plotly and Seaborn for stakeholder review.	
CyberGuard Browser Extension	Feb 2024 – Apr 2024
- Developed a machine learning security tool using TensorFlow, analyzing 5000+ malicious and benign URLs. - Achieved 92% classification accuracy and an F1-score of 0.89 through 5-fold cross-validation. - Decreased user exposure to phishing threats by 80% via real-time URL analysis executed in under 400ms. - Packaged and deployed the lightweight extension specifically for Chromium-based browsers.	

TECHNICAL SKILLS

- **Languages:** Python, Java, JavaScript, SQL
- **Frameworks:** React.js, Node.js, FastAPI
- **Cloud:** AWS (Lambda, S3, SageMaker, DynamoDB, API Gateway, IAM)
- **Tools:** Git, GitHub
- **Data:** Pandas, NumPy, Matplotlib, Seaborn, Plotly
